Business Offer

software, e-health

Behaviour Labs is an innovative Italian startup R&D company focused on eHealth and wellness needs. Our mission is to provide software solutions for humanoid robots, and virtual reality system, which can become an integral part of our daily life. We have developed "xMate" software, a LMS, learning management system with an integrated database and cloud services, who is called "roboMate" for the autism therapy with humanoid robots, "VrMate" solution to diagnose and therapy of Alzheimer and smoking addiction using virtual reality, and "NiWell" for a new immersive virtual reality wellness solution using an old cyclette, treadmill or stepper. RoboMate solution is a bundle and consist in a commercial humanoid robot, our software application, a cloud service, and a tablet to manage the therapy. "VrMate" consist of a commercial 3D virtual reality system, a Head mounted display, a cloud service, our software and our software content. Our platform "xMate" simplify the use of complex technology, and it can delivery the specific therapy we developed for autism, Alzheimer, smoking

addiction, wellness, ecc. Children with autism needs new autism therapy for the treatment of autism at home, so their parents can participate to the therapy to obtain better results. Smoking addiction, needs new solution to the therapy, people with Alzheimer needs new approach to the therapy, wellness needs new way to make fitness, and our xMate can offer it.
