

FINIGETO VINI

<http://www.finigeto.com>

Description

The Finigeto estate is located within an enviable landscape and has an extension of 32 hectares of vineyards in full. The grapevines are those typical of Oltrepò: Pinot Noir, Pinot Gris, Chardonnay, Riesling, Croatina, Barbera and Moscato; in this area, they express their varietal characteristics to the full. The vines are entirely grown by using the guyot method, with high density installations with low yields per hectare in order to obtain the highest quality products. It is on the continuous quality research that the winery Finigeto has always focused, proving what a significant level the wine products of this territory can reach. The Finigeto wines are born on this line of production with the aim of exalting the scents of this land. Our main competitiveness factors are strong image (appealing packaging), high quality and best price-quality ratio.

Organization Type

Other,

Country

Italy

City

Montalto Pavese(PV), Località cella 27 [Google map](#)

Areas of Activities

Agro-food manufacturing

Other sectors relevant to the thematic focus of the event

Business Offer

wine

We are looking for importers/distributors

Cooperation Offered

1. Outsourcing co-operation
