Business Offer

RECIRCULATING AQUACULTURE SYSTEMS (RAS) □□□□□□□□

Recirculation system development within aquaculture has entered into a new chapter and the AquaBioTech Group has been at the forefront of this technology for many years.

The AquaBioTech Group has developed number of highly efficient and cost effective recirculation aquaculture systems (RAS) for hatchery, broodstock and on-growing operations. The systems are customized according to the species and production level and are proven technologies in the field.

The AquaBioTech Group has its own proprietary RAS designs for a variety of species that cover those of major commercial importance. The company is constantly fine tuning the overall performance of its design and technology at its demonstration and R&D facility in Malta. The systems we offer are the result of many years of, research development and client feedback.

The AquaBioTech Group has its own RAS designs for a variety of species that cover those of major commercial importance.

R&D COOPERATION WITHIN HORIZON 2020

The AquaBioTech Group has participated in 14 FP6 and FP7 projects both as an RTD and as an SME. We are now looking forward to participating in Horizon 2020 projects. The company has extensive R&D facilities as well as innovative and proven technology in Recirculation Aquaculture Systems. We have a vast awareness of the current market needs and demands and therefore have strong capabilities in dissemination of R&D outcomes and commercialisation of the final product. Most importantly, our personnel come from diverse backgrounds and are experienced and highly qualified.
