# DIFFUSERS OF PROPOLIS

## DEEP BREATHS OF PROPOLIS!

Propolis is a substance made from plants and collected by bees.

The volatile fraction of propolis can be spread naturally when the sun warms up the buds of plants, which in their turn diffuse it into the environment. The volatile fraction of propolis gives a pleasant undergrowth aroma with therapeutic properties. That is why sanatoriums used to be built in wooded areas, where the volatile fraction - also known as “fresh air” - helped patients to recover and recuperate

KONTAK has developed and patented an innovative system that diffuses into the air the volatile fraction of propolis: the only one of its kind able to fully exploit the properties of sanitizing the air and its probiotic action on the whole organism.

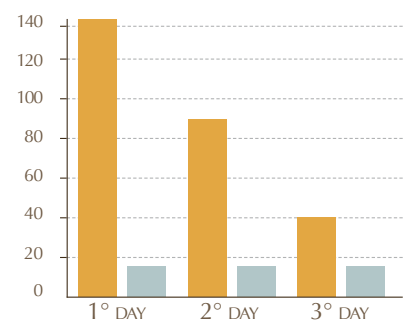

KONTAK propolis comes from unpolluted areas, far from urban, industrial and nuclear pollution. It therefore does not contain any heavy metals, pesticides or antibiotics.

KONTAK combines a passion for propolis with a scientific approach, investing in research and development, and collaborating with doctors and specialists.

The demonstration of the validity of the system PROPOLAIR is confirmed by several scientific studies, including:

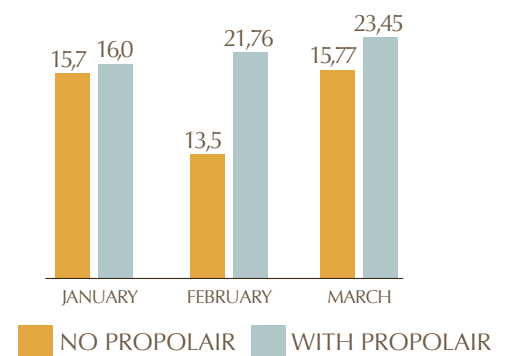

### STUDY ABOUT MICROBIAL ABATEMENT IN A SCHOOL CLASSROOM

(BIOLOGI ITALIANI). The first study, carried out by the ASL 5 Collegno (TO), confirmed that, using the PROPOLAIR propolis diffusers in a classroom for three consecutive days, has resulted in a dramatic reduction of airborne microbes up to 71,3%. An environmental sanitation completely natural!

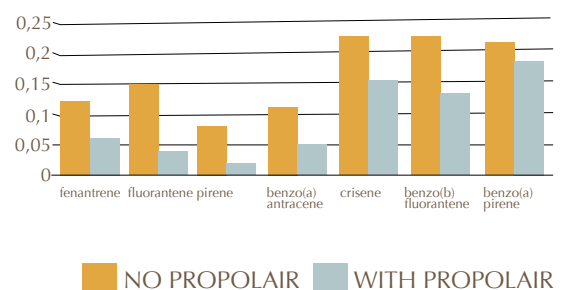

### STUDY CONDUCTED IN A NURSERY

The second scientific study was carried out at the Association House Nursery Kindergartens (MI). Throughout the period in which they used the PROPOLAIR diffusers, the number of children's absences due to illness significantly decreased and there were no manifestations of allergy or intolerance to propolis. In addition, during the following year, there was a higher frequency up to 62,1% in February.

### REDUCTION BENZENE AND IPA

The study carried out by the Chemical Laboratory of the Chamber of Commerce of Turin, has showed that with the use of PROPOLAIR diffusers they obtained a reduction of up to 82% of Pyrene and Fluoranthene, waste substances from the combustion of fuels for cars, defined by OMS (WHO) as carcinogens. The removal of benzene was 15%. In total, they were 10 air pollutants tested.

## BASIC MODELS

PROPOLAIR Diffusers spread the volatile fraction of propolis completely and selectively. In fact, they warm up propolis to the melting point of the wax fraction, then bringing it to the optimum temperature for the release of the volatile fraction. The basic version A1 is also available in version A2 with ionizer to enhance the properties of sanitization of propolis, and in version A3 with ionizer and fan, can double the radius of the cleansing action of ionized propolis to saturate environments of 60 sqm.

## WOODEN MODELS

With a real wood finish, they are ideal for any environment: offices, waiting rooms, shops and public places. They have the same operating characteristics and effectiveness of the base diffusers. They are available in three versions: L1, with ionizer L2 and with ionizer+fan L3.

## PROPOLINA MODELS

This cute, honeybee shaped diffuser P1 protects the children, harnessing the beneficial properties of propolis and surrounds your child as they sleep with the light warm and cosy glow of its antennae. Propolina is also available in a version with ionizer P2 to enhance the sanitation properties of propolis. The same features can also be found in the version in WOOD, (P3 and P4 with Ionizer) a warm and harmonious proposal made of Italian wood and water-based paint to meet the needs of consumers who are increasingly eco-conscious. The version with ionizer is recommended for children 3 years and older.

## PROPOLAIR CAR

PROPOLAIR Car is ideal for people who drive their car in urban traffic, where there is a high pollution concentration level. It is simple to use, and thanks to its adjustable base can be plugged into any cigarette lighter socket in a car, truck or caravan.

## PACK 5 CAPSULES P + B

The capsules P + B contain Italian propolis 95% and Boswellia Serrata 5%, always known for its inflammatory properties. This synergy enhances the benefits of propolis.

## PACK 5 CAPSULES BIO

The capsules are also in BIO version: Italian Organic propolis 100%, to offer the guarantee of a propolis even more safe, healthy and active.

PROPOLAIR diffusers use exclusively capsules from KONTAK. Each capsule is disposable and has a operating life of approximately 122 hours. At the end of this period, it is necessary to reset the diffuser and make the change of capsule to start a new cycle. To get the best results in the prevention of respiratory diseases and for a full environmental sanitation, KONTAK recommends the use of the diffuser 24 hours/7 days a week.

# DIETARY SUPPLEMENTS

## ORGANIC LINE

Propolis is known since ancient times for its antibacterial, anti-inflammatory and immune stimulating properties. Described as a "natural antibiotic", it is mainly used for the prevention of colds and to counteract affections of the respiratory tract (pharyngitis, tonsillitis and tracheitis) and the oral cavity.

### THE GUARANTEE OF THE HIGHEST QUALITY ITALIAN PROPOLIS

- more active on microbes
- tastier and aromatic
- more tolerable
- less allergenic
- safer and healthier

## ADULTS

### ALCOHOLIC EXTRACT 30ml

Dietary supplement useful in boosting the body's physiological defenses and for the relief in the oral cavity. Recommended use: 20 drops per day.

### THROAT SPRAY 20ml

Dietary supplement useful in stimulating and reinforcing the physiological defenses, of the body, soothing the throat and combating external aggressions. Recommended use: 2 sprays 4 times a day.

### SYRUP 150ml

Food supplement with concentrated apple juice, honeydew honey, propolis and balsamic plant extracts with a soothing action for the oral cavity. The balsamic syrup has been formulated with Echinacea, which promotes immunostimulant activity and Ribes Nigrum with powerful anti-inflammatory and antihistamine properties. It is useful in dealing with seasonal diseases. Recommended use: 2 tablespoons per day pure or diluted in a little water.

## KIDS

### EXTRACT ALCOHOL FREE 30ml

Non-alcoholic Extract of pure Italian propolis for the health of the upper respiratory tract, especially during the rigors of the cold season or in areas of high air pollution. Recommended use: 20 drops a day in honey, dispersed in water or directly into the mouth.

### THROAT SPRAY 20ml

Food supplement, useful to give quick relief to the throat and mucous lining of the oral cavity. Thanks to the absence of alcohol and the pleasant taste of strawberry, is particularly suitable for children. Recommended use: 2 sprays 4 times a day.

### SYRUP 150ml

Kids Syrup has been formulated with Echinacea, which possesses immunostimulant properties, Black Currant with the powerful anti-inflammatory and antihistamine properties and Carpino which exerts anti-inflammatory and healing properties in the upper airways, while in the lungs has antispasmodic properties. Designed specifically for the needs of children, it helps the body deal with seasonal diseases. Recommended use: 2 tablespoons per day directly or diluted in a little water.

All the benefits and effectiveness of Italian organic propolis even in practical single-dose vials, taken daily to strengthen your immune system naturally.

## PROPOLDAY ORGANIC LINE

Dietary supplement made of propolis reserved for adults and junior. It strengthens naturally the body, improving the immune system against external aggression. It is advisable to use at the approach of winter and in the seasonal changes. Naturally gluten-free.

### PROPOLDAY ADULTS

### PROPOLDAY JUNIOR ALCOL-FREE

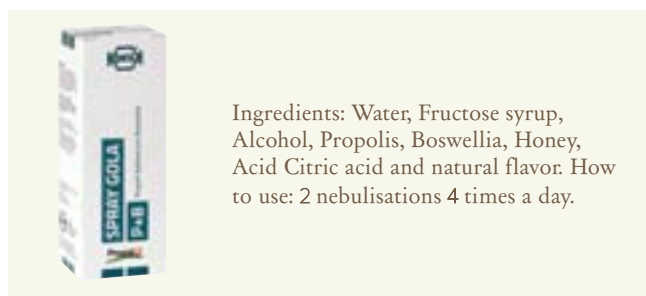

## P+B LINE

The effectiveness of propolis meets Boswellia Serrata, resin known for its anti-inflammatory properties, useful in the treatment of joint pain, fever and cough with tonic and expectorant effect.

### THROAT SPRAY

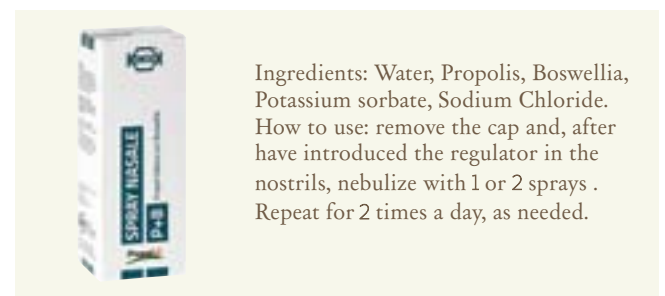

20ml

Ingredients: Water, Fructose syrup, Alcohol, Propolis, Boswellia, Honey, Acid Citric acid and natural flavor. How to use: 2 nebulisations 4 times a day.

### NASAL SPRAY

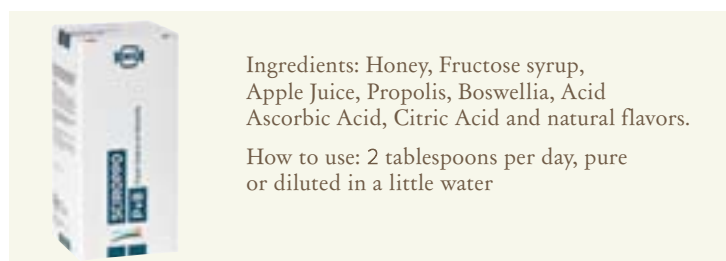

10ml

Ingredients: Water, Propolis, Boswellia, Potassium sorbate, Sodium Chloride. How to use: remove the cap and, after have introduced the regulator in the nostrils, nebulize with 1 or 2 sprays. Repeat for 2 times a day, as needed.

### SYRUP

150ml

Ingredients: Honey, Fructose syrup, Apple Juice, Propolis, Boswellia, Acid Ascorbic Acid, Citric Acid and natural flavors. How to use: 2 tablespoons per day, pure or diluted in a little water

# CANDIES AND CHEWING GUM

PROPOLIT is a complete line of sweets, gumdrops, jellies and chewing gum which uses only quality ingredients: organic Italian propolis: natural flavors, cane sugar, Stevia, gluten free, with no artificial coloring. A line of sweets and gumdrops, which combines whim with the qualities of propolis.

## ORGANIC SWEETS AND GUMDROPS

31gr
